Thanks John. I am reading again this morning's email from David Anton. If we don't want to keep changing the ltr, we could technically probably still use yesterday's version, since he said he would send us "next week," and the letter is supposed to be dated on Monday, 6/18. I also asked for the photos they said they would send re allegation about material from Parcel E-2 moving to the pile on Parcel A-1. I don't have strong feelings either way.

Brianna

The photos related to manholes that Mr. Bowers has located are from different manholes he was also involved with. The photos referenced are:

Date	Location
2/3/2004	Manhole building 134/113A - Bowers in manhole
2/9/2004	Manhole near B-304 - photo of above ground over manhole being worked
3/29/2004	Manhole building 606 - Bowers in manhole

Since these are not directly related to parcel A, you may or may not be interested in these photos. Let me know if you want them and I will send them to you next week when I am back in the office. I tried to send them via my laptop without success.

Ok with Lily's edit. Just for the last part of the sentence, how about "..., and we are reviewing the additional information they provided. "

Will defer to John and Brianna but if folks are fine with that change, I can send this revised draft including Lily's latest change when I send to Jeanine Womble who is my counterpart with the Navy. I talked with Jeanine to give her a heads-up our draft response would be coming today.

Jeanine told me she also expects to share the Navy's draft later today as it is currently at the Deputy Assistant Secretary level of review and once that is completed, she plans to share with us.

Dear Brent,

The draft ltr says that we are still waiting on information from the people who made the allegations. But they have given us most of what they offered. By the time the ltr goes out 6/18, we may have received all of it. So I suggest change to this language:

Regarding the new allegations about Parcel A at the former Navy property, EPA and the Navy participated in a site walk with the individuals who made the allegations, and we are reviewing the information provided. While we conduct that review, EPA and the Navy agree that it is prudent to proceed with plans to test the area.
